Bachelor of Administrative Sciences Degree with a major in Accounting and a minor in Computer Science، Yarmouk University، 1994

أنشطة التدريس

ACCT101 - Introduction to Accounting، This is an introductory course in accounting and focuses on using accounting information, preparation and interpretation of accounting data, nature of assets, liabilities and capital, understanding accounting reporting process, calculation of business profits and losses and preparation of financial statements for sole proprietors. This course shall enable the students to handle task of accounts assistant at junior level.

ACCT206 - Financial Accounting I، This course is an in-depth examination of the Theory, Principles, Procedures, Practices and issues associated with items presented on Financial Statements, with emphasis on adjustment and opening closing entries necessary before the presentation of Final Accounts. On completion of this semester the learners will be able to manage accounts of any sole trading organization and thus best suitable to handle the position of accountant.

ACCT308 - Corporate Accounting، This course relates to the preparation of financial statements for companies and corporate bodies. This course is expected to cover the application of International Accounting Standards (IFRS) and disclosure requirements. The students will understand the issue, redemption, forfeiture, re-issue of forfeited shares and securities.

ACCT 454 - Internship in Accounting، An internship experience provides the student with an opportunity to explore career interests while applying knowledge and skills learned in the classroom in a work setting. The experience also helps students to gain practical knowledge in the field accounting profession, a clear sense of what they still need to learn and provides an opportunity to build professional networks.

ACCT455 - Graduation Project in Accounting، This course emphasizes on developing research and problem-solving skills among the undergraduate students. The students will work on a self-defined research project supervised by a faculty member. The students will be trained on how to do the research project. The students will identify a research problem and prepare a well-defined research proposal. The students are expected to conduct literature review, develop research questions, objectives, and appropriate methodology; collect and analyze data and present the findings in an appropriate form. The students are expected to prepare a well-defined project report covering all aspects followed by a presentation on the same. This course is to be completed in two consecutive regular semesters fulfilling all requirements of the course in accordance with the Graduation Project Guidelines.

ACCT631 - Accounting for Extractive Industries (Master of Accounting)، This Accounting for Extractive Industries course provides the essential financial knowledge and skills to enable students to successfully handle accounting and finance issues and to prepare, understand and evaluate financial accounts for the Mining and Oil & Gas industry. It focuses on the finance and accounting issues specifically affecting the industry including: IFRS 6 Exploration for and

Evaluation of Mineral Assets, Accounting Approaches, The “Successful Efforts” (SE) and “Full .Cost” (FC) Method, Accounting for Reserves, Resources & Assets
