:Teaching Philosophy

Being a pharmacist and as a university educator my teaching philosophy is focused on the concept that, I am a facilitator of student learning process and the students are responsible for their own learning as the mainstream of my teaching is through didactic and online forums. I create multiple discussion topics to keep the online discussion exciting and stimulating and to address the learning objectives. My teaching philosophy also includes the concepts of professionalism, ethics, and accountability. My objectives as a university educator are to nurture critical thinking skills, to facilitate the acquisition of lifelong learning skills, to support the students to develop evidence-based clinical problem-solving skills , to prepare students to function as highly skilled and competent pharmacists across the scope of pharmacy practice and to motivate pharmacy students to be Entrepreneurs
